

## Basic foot care

Get the essential knowledge and skills you need to perform basic foot skin and nail care

**Did you know?** The link between healthy feet, skin and nails and healthy ageing is clear. The skills needed to support your residents and clients are vital to meeting their individual need. Learning the techniques will add to your professional expertise.

The basic foot care online course will develop your skills and knowledge to implement basic foot care for older people. The course will cover the relevant anatomy and physiology of the foot, as well as identifying abnormalities/disorders of the foot and how to care for clients requiring foot and nail care.
